

ISO/IEC 27001:2022 Training & Certification for the Busy Professional

Comprehensive real-world training & certification offered in a flexible manner that fits into YOUR schedule and is based on ISO/IEC 27001:2022 requirements. Offered as either “Self-Paced” via on-demand web learning, or with a LIVE, experienced, and certified instructor to guide you and answer questions. Live courses are spread out over 8 weeks with 5 hours per week of virtual instructor training to give yourself time to ingest, ask questions, and apply the concepts and materials. Both training options are all-inclusive, meaning that they cover everything you need to get the certificate (written materials, examples, best practices, exercises & quizzes). They are packed with practical exercises and case studies which will help you be equipped with real-world expertise that you can immediately apply to your day-to-day operations and activities. The three main courses are:

ISO 27001:2022 - Foundation – Understand the fundamental elements of an Information Security Management System (ISMS).

ISO 27001:2022 – Lead Implementer – Implement and maintain an ISMS based on the requirements of ISO/IEC 27001.

ISO 27001:2022 – Lead Auditor – Plan and carry out an internal or external audit of an ISMS based on ISO/IEC 27001 in compliance with ISO 19011 and ISO/IEC 17021-1.

These trainings and certifications are for those who are or will be involved in building, managing, and/or auditing an Information Security Management System (ISMS) based on ISO/IEC 27001. There are three different trainings. The one that is right for you depends on your role and goals.

Training Course	Self-Paced (On-Demand) materials and videos & certification exam	Live Virtual Instructor + All Self-Paced (On-Demand) materials and videos & certification exam	Who benefits from this training and certification?
